

LOWERGY

SCHEMATIC ILLUSTRATION SAVINGS (EXCLUDING VAT) WITH RENSLI FUEL ADDITIVE

The following values and assumptions form the basis of the above three graphs:
- Fuel consumption **before additive**: 4.0 Lit/mile - Fuel price: £1.25 (excl. VAT) - Savings through Ferox additive: 7%

The above general illustration is based on fully realistic assumptions/parameters. However, they should be verified/adapted to each current vehicle. The exact percentage of fuel savings depends on several variables and can be both slightly larger/slightly smaller. Individual testing is required on a case-by-case basis.
