

LOWERGY

Efficient and Planet Friendly Heating
From The Swedish Experts

Now in The UK!

Did you know your Community facility could be entitled to a funded heating upgrade?

Funding is available for Scottish community facilities - such as community centres and sports halls - to upgrade their heating systems with renewable energy.

Here at **Lowergy**, we understand that many organisations can be put off by what is often considered a complicated and convoluted process. And that is why we are currently working together with several funding organisations, where we endeavour to source funding for community/sports halls, with eligibility ranging from 40% to 90% funding.

Let us do the hard work!

Remember though, the reduced rate of VAT for energy saving materials installed in buildings used for a relevant charitable purpose is to be withdrawn from August 2013 so get in touch now to take advantage of what funding streams may be available your organisation.

What our customers say

"It's all working splendidly....I also received a substantial repayment from Scottish Hydro for these last six months, as their estimate had been based on last years bill."

Arther Blue, Ardrishaig

"You may be interested to know that after the big winter storm, the 7-day winter power failure on Kerrera closed down Mt Pleasant oil fired central heating for 4 months BUT your **Lowergy** Air to Air Heat Pump carried on working and kept the house safe and aired until we got back. Hurrah! "

John and Jo Grange, Kerrera

"Village hall installation is ticking away like a dream, the community here are very pleased with it."

Steve Brown – Knoydart Village Hall

"The Air to Air Heat Pumps from **Lowergy** are a fantastic source of heating. We are saving on heating bills; it spreads the heat in the entire hall, which allows us to use the hall more efficiently. So we have decided to buy two more units for other parts of our premises. We can really recommend air to air heat pumps from **Lowergy**."

The Antonine Sport Centre, Clydebank

"We were pleased with the communication and support from **Lowergy**, and the installation itself was quick and straight-forward. A recent community questionnaire found that the new heating was amongst one of the best features of the hall!"

Iona Village Hall Committee

"**Lowergy** were informative and gave their support throughout the whole process. We are all really impressed with how well the Air-to-Air Heat Pumps heat our huge sports hall...and much cheaper too!"

Twechar Healthy Living and Enterprise Centre

Lowergy's Air to Air Heat Pumps can save 30 - 50% off energy bills.
